

Tie Bar & Drum Covers

Tie Bar Covers

Tie bar covers are what they sound like, simply covers that fit over the tie bars. They are used for several purposes by lots of different industries. For example medical moulding or moulders of very fragile parts that need to be protected from blemishes while hot and ejected from the mould. They fit over the tie bar and fasten with plastic zippers. They are attached at each end with magnets to the mould frame. Another use is in label insert moulding. Sometimes the label is ejected and falls onto the tie bar. As the tie bar closes the label is sucked into the tie bar slide and ruins the seals.

They come in sets of 4 (one for each tie bar) and come in sizes of 3", 4", 5", 6" diameter. You must state the length required when ordering. Length is the maximum platen size when the mould is open. They have plastic zippers to hold them closed and they attach at each end with magnets.

Model No.	Description	Price
TBC-003	Set of 4 Tie Bar Covers 3" diameter	£169.00
TBC-004	Set of 4 Tie Bar Covers 4" diameter	£186.00
TBC-005	Set of 4 Tie Bar Covers 5" diameter	£198.00
TBC-006	Set of 4 Tie Bar Covers 6" diameter	£204.00

Drum Covers

Our drum covers fit drums with a diameter of between 48 and 60 cm and take a 7 cm vacuum tube. They fit snugly round the rim of the drum with elastic and velcro straps and have a transparent plastic window on top to enable the contents to be viewed.
